Article I. General Information

Section 1.01 *Method of Source Selection*

Section 29-154 of the Unified Government of Wyandotte County / Kansas City, Kansas Procurement Code allows for the use of Competitive Sealed Proposals (RPF) process when it is determined that Competitive Sealed Bidding is either not practicable or not advantageous to the Unified Government by the Procurement Department as permitted.

Section 1.02 *Purpose*

The Unified Government of Wyandotte County/Kansas City, Kansas, Department of Transportation is accepting competitive proposals from qualified individuals, firms, partnerships and corporations for the purpose of Installation and Integration of Automatic Passenger Counters (APC) and Automatic Voice Announcement (AVA) Systems.

Offerors providing such services must meet the requirements, as specified herein.

Solicitations from qualified firms are encouraged by the Unified Government of Wyandotte County/Kansas City, Kansas.

Section 1.03 *Existing Environment*

The Unified Government of Wyandotte County/Kansas City, Kansas is a consolidated city/county government serving all of the citizens of the City of Kansas City, Kansas, and Wyandotte County, including, through county programs, residents of Wyandotte County's unincorporated areas and the three other cities within its borders: Bonner Springs, Edwardsville, and a portion of Lake Quivira. The City of Kansas City, Kansas is located entirely in Wyandotte County which, along with ten other Kansas and Missouri counties, makes up the Greater Kansas City Metropolitan Area with a population of approximately 2.1 million. For clarity, the cities of Kansas City, Kansas and Kansas City, Missouri are separated by the Kansas-Missouri border and are independent of one another in all aspects. This RFP focuses exclusively on the City of Kansas City, Kansas and Wyandotte County, Kansas.

Section 1.04 *Required Review*

Offerors should carefully review this solicitation to fully understand the scope of work and for defects and questionable or objectionable items. Comments or questions concerning this RFP must be made in writing and received by the procurement officer at least ten (10) days before the proposal opening. This will allow issuance of any necessary addendums which will be shared publicly and with all notified potential bidders. Protests based on any omission or error, or on the content of the solicitation, will be disallowed if these issues have not been brought to the attention of the procurement officer, in writing, at least ten (10) days before the time set for opening.

Section 1.05 *Protests and Appeals*

Any protest or appeal of the award of the Agreement must be in writing and received by the Director of Purchasing within seven (7) days of the County Administrator's decision of award of contract.

The written communication must list the specific areas of protest and suggested remedy. Only timely protests or appeals will be considered, and the decision of the Purchasing Director on any protest or appeal shall be final and binding with no further appeal.

Section 1.06 *Inquiries - Clarifications*

Any questions regarding the Request for Proposal shall be directed in writing to the attention of the buyer via fax or email, to the Office of Procurement and Contract Compliance ATTN: Kelly P. Regan, kregan@wycokck.org Room 649, 701 North 7th Street, Kansas City, Kansas 66101. All questions must be received no later than the date established in the project timetable. Telephone conversations must be followed up in writing by the interested party.

Two types of questions generally arise. One may be answered by directing the questioner to a specific section of the RFP. These questions may be answered over the telephone. Other questions may be more complex and may require a written addendum to the RFP. The procurement officer will determine the appropriate method to be used.

Section 1.09 *Implied Requirements*

Article IV. Background Information

Section 4.01 *Background Information*

Introduction:

The Unified Government Transportation Department (UGT) is committed to enhancing mobility services for the residents of Wyandotte County/Kansas City, Kansas. To improve data collection and enhance rider experience, UGT seeks proposals for the installation of Automatic Passenger Counters (APC) and Automatic Voice Announcements (AVA) systems for its fleet of 25-foot cutaway buses.

Project Overview:

The UGT operates a local fixed route service along major travel corridors and a range of other mobility services, including Microtransit and ADA paratransit. Currently, ridership is tracked manually, which presents challenges in data accuracy and operational efficiency. This project aims to install between 12-14 APCs and AVAs to improve ridership data collection and enhance the passenger experience.

Article V. Project Scope

Section 5.01 *Scope of Work*

Scope of Work for Automatic Passenger Counters (APC) and Automatic Voice Announcements (AVA) Systems

Automatic Passenger Counters (APC)

- **Installation:** Proposals should include the installation of **14 APCs** on UGT's fleet of 14 cutaway buses.
- **System Requirements:**
 - The **APC system** must accurately count passengers boarding and alighting at each stop.
 - The system should be capable of integration with existing software platforms, specifically **Remix by Via** and **Swiftly**.
 - Proposals should include details on the **necessary software** required for the APC system to function properly.
 - The APC system should be able to store and transmit data in real-time or as scheduled.
 - Proposals should also detail the necessary **grade of vehicle routers** for the APC upgrade, including costs and recommendations for replacement if applicable.
 - Provide detailed specifications for **APC software** that will enable UGT to retrieve, analyze, and report ridership data.

Automatic Voice Announcements (AVA)

- **Installation:** Proposals should include the installation of **AVA systems** on the same fleet of buses as the APCs.
- **System Requirements:**
 - The **AVA system** must provide clear and accurate voice announcements of bus stop names and any relevant information for passengers.
 - The AVA system should be synchronized with the APC system to provide **real-time information** to passengers.
 - Proposals should detail the **software** required for the AVA system, including how it integrates with the APC system to provide consistent, accurate information across platforms.
 - The AVA system should be capable of being updated with new routes or changes to ensure that passengers always have the most current information.

Integration and Compatibility

- **Seamless Operation:** Ensure that both systems (APC and AVA) operate seamlessly with existing UGT technologies, such as **Remix by Via** and **Swiftly**, ensuring smooth data flow and functionality.
- **Unified Data Output:** Both systems must provide a unified data output that can be used for analysis, reporting, and system performance tracking.
- **Software Requirements:** Proposals should detail any **additional software** or **hardware** needed for the successful integration of the APC and AVA systems.
- The contractor should also ensure that both systems can share data, providing real-time ridership counts that are reflected in both software platforms (Remix and Swiftly).
- Proposals should also include any necessary **training materials** and **support** for UGT staff to effectively operate and maintain both systems.
- List how you will integrate with these solutions and is it managed and maintained by you or are we expected to maintain those integrations.
- Is there a standard API available with the proposed solution? “If the solution offers a standard API then it allows for the possibility for these solutions to integrate with other solutions down the road and doesn’t create a data silo.
- Do you support “Single Sign On (SSO)” using Microsoft Entra ID as this is an IT requirement and that way when it comes to having to update/manage the equipment a UG employee doesn’t have to have multiple passwords, but it also allows for additional security measures to be in place.

Project Timeline

- Proposals should include a **project timeline** with detailed milestones for all stages of the project, including the procurement of hardware and software, installation of APC and AVA systems, integration with existing platforms, and training for UGT staff.
- The project timeline should be structured to ensure **completion by December 31, 2025**. This should include:
 - Design, procurement, and delivery of APC and AVA systems and associated software.
 - Installation and integration of systems with UGT’s existing technologies.
 - Full system testing, debugging, and operational training.
 - Final system review and acceptance.

The Department of Unified Government Transportation (UGT), Division of Transportation Services is soliciting proposals for the installation of Automatic Passenger Counters (APC) and Automatic Voice Announcements (AVA) systems for its fleet of cutaway buses.

The department wants assistance to install, integrate, and implement the APC and AVA systems, ensuring they work seamlessly with existing software platforms (Remix by Via and Swiftly), and provide accurate ridership data and real-time voice announcements to improve the passenger experience.

The consultant will provide the installation and integration services for the APC and AVA systems, ensure compatibility with UGT's current technologies, and provide training, maintenance, and support for these systems as needed.

The types of staff in Unified Government agencies that the contractor must interview are personnel from the UGT Operations, IT, and Fleet Management teams, as well as drivers and any other relevant UGT staff familiar with the current systems and operational processes.

Other helpful informational material that can be provided to the consultant includes data regarding UGT's existing software systems (Remix by Via and Swiftly), fleet details (cutaway bus specifications), current technology infrastructure, and ridership patterns.

The goal of this project is to enhance ridership data collection, improve operational efficiency, and create a better experience for passengers through real-time voice announcements on buses, all while integrating new systems with existing technology platform.

Section 5.02 Deliverables

The contractor will be required to provide the following deliverables:

- a. Installation of 12-14 Automatic Passenger Counters (APCs)** on UGT's fleet of cutaway buses, fully operational and integrated with UGT's existing systems, along with the necessary APC software for accurate data collection and reporting.
- b. Installation of Automatic Voice Announcements (AVA) systems** on the same fleet of buses, ensuring clear and accurate voice announcements of bus stops and relevant passenger information, along with the required AVA software for real-time synchronization and updates.
- c. Integration of both APC and AVA systems with existing software platforms**, specifically Remix by Via and Swiftly, ensuring seamless data transfer, compatibility with UGT's infrastructure, and full system functionality.
- d. Associated software for both APC and AVA systems**, including any required licenses, user interfaces, and administrative tools to manage and monitor the systems for both systems.
- e. Detailed project timeline** outlining key milestones and completion dates for the APC and AVA installations, software integration, and training.
